Pakusarakan Jl.Larasantang No 10 Blok 12 Desa Tanimulya Kecamatan Ngamprah Kabupaten Bandung Barat

I'm a Junior Software Developer with a strong interest in full-stack web and mobile development. I have hands-on experience in system analysis, system design, UI/UX, web development, mobile development and cloud computing.

Work Experiences

PT Blue Power Technology - South Jakarta

Oct 2024 - Present

Developer

- Designed a Geographic Information System (GIS) application solution using the SuperMap GIS platform
- Developed a GIS-integrated application using SuperMap GIS Platform by combining technologies such as Express.js, React.js, and Vue.js for web platforms, Flutter for mobile development, and Unity for VR/AR experiences.
- Handled maintenance and updates for existing applications.

Pasundan University Faculty of Engineering, Informatics Engineering Major - Bandung

Feb 2021 - Jul 2023

Laboratory Assistant

- Laboratory assistant of web programming using HTML, CSS, Javascript (2021), web development using laravel framework (2022), object oriented system (2022), and project management (2023).

Ministry of Communication and Information Technology of the Republic of Indonesia - Bandung

Feb 2023 - Apr 2023

User Interface Designer Freelance

- Created a user interface for the e-auction web application. E-auction web application is an auction application used by the Ministry of Communication and Information Techonology.

Pasundan University Faculty of Law - Bandung

Dec 2022 - Jan 2024

Back-end Developer Internship

- Created a RESTful API for payroll application at the Faculty of Law, Pasundan University. That can integrate with the SIMAKU FH UNPAS superapp, the back-end was built using Laravel framework and front-end was built using Vue JS.

Education Level

Universitas Pasundan - Bandung

Sep 2019 - Jan 2024

Bachelor of Informatic Engineering, 3.56/4.00

- Graduate with 3.56 GPA (Cumlaude)
- Laboratory assistant in informatic engineering major
- Participating in the kampus merdeka program, namely independent study in cloud computing at the Bangkit Academy 2022 program

SYNRGY ACADEMY by BCA & BINAR ACADEMY - Online

Feb 2024 - Aug 2024

Certificate in Course Fullstack Web Javascript, 91.50/100.00

- Learn about web basic (html,css,js), node js, typescript, and react js
- Creating web and mobile banking applications that are accessible and easy to use by all users, including the visually impaired. Collaboration between the product team (UI/UX), Backend team (Fullstack web javascript & Java), and Front-end team (Fullstack web javascript).

BANGKIT ACADEMY led by GOOGLE, TOKOPEDIA, GOJEK, & TRAVELOKA - Online

Feb 2022 - Jul 2022

Certificate in Cloud Computing Learning Path, 87.15/100.00

- Learn web basic, basic back-end using node.js and cloud computing using google cloud platform.
- Make a final project with kotlin, machine learning, node.js and google cloud platform. My contribution in this project is create a restful api backend using node.js and deploy to google compute engine to connect api with mobile apps. Using cloud sql database for saving relational data and preparing cloud storage for saving dummy images for user and dummy data.
